

From AI Hype to Operational Reality

Cost, Complexity, and the Future of Enterprise AI

AI has a new problem.

Cost.

Complexity.

Operational chaos.

AI amplifies fragmentation.

Fragmented data

Disconnected workflows

Duplicate experimentation

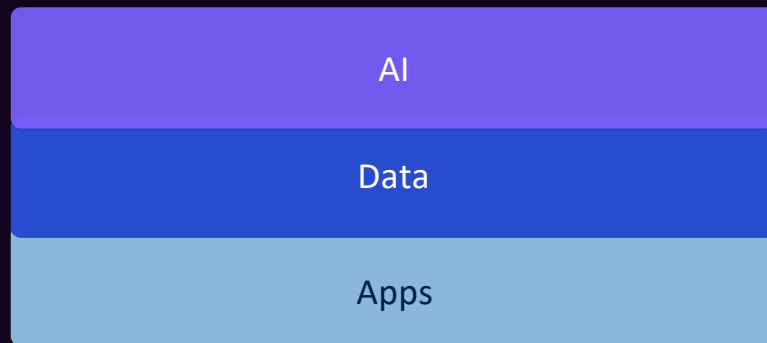

Model sprawl

Rising inference costs

Governance gaps

Only **1 in 5** AI PoCs succeeded in 2024.

IDC Future Enterprise Resiliency and Spending Survey, 2025

The winners will not be
the companies using the most AI.

They'll be the companies
integrating AI **coherently.**
